Javier Valderrama

Senior Consultant / Line Manager / Development Lead / Career Coach at Endava

Summary

19+ years of caree as software engineer, team lead, technical interviewer and passionate mentor.. Notwithstanding my early experience as LAMP developer, since 2010 I'm fully dedicated to the JavaScript ecosystem both backend (Node.js) and front end

As Team/Tech Lead I was involved in projects related to EMC Corporation, Razorfish, Tableau and Lululemon.

Abilities
• Strong analytical and problem solving skills.
• Experience in GUI design and UX.
• Highly adaptive and flexible.
• Quality oriented and clear design approach.
• Able to work independently or in a team.
• Self started attitude.
• Passionate programmer.
• Excellent communicational skills.

Languages:
Spanish (Native), Italian (fluent), English (fluent)

Passport:
Italian and argentinian

Visa:
USA travel ESTA.
Canada travel ETA.

Technologies:
ES5, ES2015 +, ESNext, NodeJs, React, Angular, Webpack, Jest, jQuery, WebdriverIO, Selenium WebDriver, TravisCI, XMLrcp, Twitter Bootstrap, Knockout js, Jasmine, Karma, BackBone js,

Lodash, Handlebars, Git, AEM (Adobe Experience Manager), XSLT, UML, PHP 4/5, OOP, MySQL, HTML 4.1/5, XML, CSS3

Experience

Endava

1 year 9 months

Senior Consultant / Line Manager / Development Lead / Career Coach
January 2020 - Present (7 months)
Rosario, Santa Fe, Argentina

Purpose of position:

Cross team mentoring, training and consulting.

Lead JS internal training initiatives and promote technical excellence within Endava's Rosario DU

Especially focused on removing knowledge silos and increase the bus factor

Lululemon's Project:

Focusing on working close to Lululemon's Foundation engineering team (architecture) to identify the milestones to progressively and transparently implement the transition of a specific set of legacy code to match the rest of the codebase's standard.

Design an iterative Legacy Code migration process taking in consideration the following aspects:

• Keep backwards compatibility
• Improve performance and security
• Raise the Unit Test coverage threshold
• Refactor to improve the modularity and enable code sharing
• Identify deprecation candidates
• Propose an alternative workflow and branching system
• Provide an exhaustive documentation and insights so that others can continue the work independently

Currently working with the following technologies:

• NodeJs
• Git
• GitFlow
• ES5 / ESNext (>=2015)

• Jest
• Webpack
• Babel
• Grunt
• RequireJs
• jQuery

Current project: Lululemon
http://lululemon.com

Consultant / Line Manager / Development Lead / Career Coach
May 2019 - January 2020 (9 months)
Rosario, Santa Fe, Argentina

Purpose of position:
Cross team mentoring, training and consulting.
Ramp up and Lead Endava's na-checkout team

Manage multiple software development teams by providing technical direction and helping to ensure that the project is completed on time and on/under budget.

Main responsibilities
• Manage development teams by conducting daily stand ups, ensuring sprints are completed on time and removing impediments.
• Provide guidance for the team with technical architecture as needed
• Participate in code development (part-time) by actively writing code and conducting unit testing
• Provide technical leadership for project and team through design and code reviews, ensuring best technical practices are applied.
• Mentoring the project team with client communication, interpersonal communication, technical practices, etc.
• Work with development team to troubleshoot development environment, production environment, performance tune and optimize code
• Participate in the interview process for Developers

Currently working with the following technologies:
• Vanilla Javascript
• NodeJs
• jQuery
• Sass

• Git
• ES2015 (ES6)
• jest
• webpack
• babel
• Grunt
• React
• Vue

Current project: Lululemon
http://lululemon.com

Consultant / Line Manager / Development Lead
November 2018 - January 2020 (1 year 3 months)
Rosario, Santa Fe Province, Argentina

Velocity Partners merged with Endava in 2018.

Purpose of position:
Cross team mentoring, training and consulting.
Designing the architecture for the new web data connectors framework to provide a simple API allowing students and expert engineer to develop web data connectors easily, providing out-of-the-box solutions for common patterns (data gathering/mapping, error handling, flow control), unit testing, automation, performance tuning, open-sourcing.

Manage multiple software development teams by providing technical direction and helping to ensure that the project is completed on time and on/under budget.

Main responsibilities
• Architect for the wdc-framework and framework dependent web data connectors.
• Manage development teams by conducting daily stand ups, ensuring sprints are completed on time and removing impediments.
• Provide guidance for the team with technical architecture as needed
• Participate in code development (part-time) by actively writing code and conducting unit testing
• Provide technical leadership for project and team through design and code reviews, ensuring best technical practices are applied.

• Mentoring the project team with client communication, interpersonal communication, technical practices, etc.
• Work with development team to troubleshoot development environment, production environment, performance tune and optimize code
• Participate in the interview process for Developers

Currently working with the following technologies:
• Vanilla Javascript
• LoDash
• Q
• NodeJs
• Should/Mocha
• Selenium
• istanbul
• chakram
• jQuery
• Sass
• Tableau
• Travis CI
• Git
• ES2015 (ES6)
• jest
• webpack
• babel

Current project: Tableau Software
Tableau Software is an American computer software company headquartered in Seattle, Washington. It produces a family of interactive data visualization products focused on business intelligence. (http://www.tableau.com/)

Velocity Partners
5 years

Sr Team Lead / Sr. Front End Software Engineer
November 2017 - Present (2 years 9 months)
Rosario, Argentina

Tableau Software
1 month

TC18 Conference Speaker
October 2018 - October 2018 (1 month)
Greater New Orleans Area

As part of the Web Data Connectors team at Tableau I was sharing, together with Mario Guzzi , our experience, knowledge and problem solving tips we use every single day on our production pipeline. In the presentation went through the steps required to build an advanced Web Data Connector. To support the presentation, a repository was created with well detailed and profusely documented code so that you can understand what it takes to create

a maintainable, reliable and production quality WDC. The code has a direct link to the official documentation so you can make this connection and learn.

The breakout session happened at the Ernest N Morial Convention Center (MCCNO).

Mentor at the Hackathon presented by Netflix
October 2018 - October 2018 (1 month)
Greater New Orleans Area

As WDC engineer, support the hackathon attendees on creating their first Extension for Tableau.

Extract from (https://tc18.tableau.com/learn/sessions/32525)
Get ready for another round of Hackathon presented by Netflix! This year aims to be bigger, better and heavy on the APIs. Conjure your creative juices and come hack away. We'll keep your energy levels amped with snacks, drinks, and our staff of geeky cheerleaders.

Tableau Software
TC17 Conference Speaker
October 2017 - October 2017 (1 month)
Las Vegas, Nevada Area

As part of the Web Data Connectors team at Tableau I was sharing, together with Mario Guzzi , our experience, knowledge and problem solving tips we use every single day on our production pipeline. In the presentation we shared what we've learned through two years of releasing WDCs to production: which tools we use, the most critical phases to consider, and the rabbit holes we've found along the way.

The breakout session happened at the Mandalay Bay Convention Center.

https://tcschedule.tableau.com/sessions/1866960509

Tableau Software
Mentor at the Web Data Connector Hackathon
October 2015 - October 2015 (1 month)
Las Vegas, Nevada Area

As WDC engineer, support the hackathon attendees on creating their first Web Data Connector.

Extract from (http://tc15.tableau.com/schedule/wednesday)
One of the most exciting features in Tableau 9.1 is the Web Data Connector (WDC) which allows connecting to any web-based data source. Creating a WDC involves writing a simple web application (using HTML and JavaScript) that uses the new Tableau WDC SDK. At the WDC Hackathon, we're providing expert mentors from the Tableau dev team, some good food and drinks, and the space to help you build a connector to your favorite data source. There will be prizes too! BYOL (bring your own laptop) and come ready to have a blast building a connector that brings more data into Tableau! Space is limited.

Globant

1 year 4 months

Technical Leader / PLD Software Designer (Web UI front end)

May 2015 - August 2015 (4 months)
Rosario, Santa Fe, Argentina

Purpose of Position:
Working at a Studio with the Project Manager to execute and comply with small and mediumscale
projects as the person responsible for the global technical design, approving global architecture and ensuring design revision, influencing on team members.

Main Tasks and Responsibilities:
• Responsible for the general quality of codes, ensuring both that the code is reusable and verifiable, and that it is reviewed.
• Responsible for approving metrics to assess ongoing activities in projects, their analysis and use to improve both efficiency and quality.
• Responsible for setting the team's objectives together with the PM and defining the metrics related to them.
• Influencing on the team to meet objectives; negotiating processes, metrics and objectives with customers' teams.
• Responsible for technical training, the general performance of technical teams' members and actively sharing knowledge by means of consultation among peers and training (internal courses) on specific technologies.
• Identifying professional opportunities. Enhancing staff's skills.

Currently working with the following technologies:
• Vanilla Javascript :)

• AngularJS
• Underscore
• BackBone js
• Handlebars
• jQuery
• Git
• Modernizr
• AEM 6 (Adobe Experience Manager) AKA CQ*
• Sightly
• Fatwire
• Twitter Bootstrap
• SASS
• Bourbon
• Neat
• Jsp

Technical Leader / Sr. Web UI Developer

May 2014 - May 2015 (1 year 1 month)

Rosario, Santa Fe, Argentina

Purpose of Position:

Working at a Studio with the Project Manager to execute and comply with small and mediumscale
projects as the person responsible for the global technical design, approving global architecture and ensuring design revision, influencing on team members.

Main Tasks and Responsibilities:

• Responsible for setting the team's objectives together with the PM and defining the metrics related to them.
• Influencing on the team to meet objectives; negotiating processes, metrics and objectives with customers' teams.
• Responsible for technical training, the general performance of technical teams’ members and actively sharing knowledge by means of consultation among peers and training (internal courses) on specific technologies.
• Identifying professional opportunities. Enhancing staff's skills.

Currently working with the following technologies:
• Vanilla Javascript :)
• AngularJS
• Underscore
• BackBone js
• Handlebars
• jQuery
• Git
• Modernizr
• AEM (Adobe Experience Manager) AKA CQ*
• Fatwire
• Jive
• Twitter Bootstrap
• SASS
• Jsp

Conference speaker
October 2014 - October 2014 (1 month)
FICH-UNL - Universidad Nacional del Litoral

October the 10th, Leading the conference "UI: the future of web app development and UI/PLD role"

Open conference for the community and University students about the past, present and future of the UI/PL developer's role and carrier opportunities, covering from 1998 up to the near future.

Conference Speaker and Hackathon coordinator
October 2014 - October 2014 (1 month)
Globant's offices - NordLink - Rosario - Argentina

October the 25th, Responsible for one of the 4 conferences during the Hackathon and the coordination of the practical works together with the other speakers/coordinators (Bernardo Cases, Frank Kalbermatten, Cristian Hernandez, Braian Monnier)

Conference:

Create a JavaScript App From Scratch

Topics:
- Abstraction (identifying the base components)

- KISS
- DRY
- SoC (separation of concerns) and Cyclomatic complexity
- Model vs Raw Data
- Declarative VS Imperative
- Building a pseudo MVC with vanilla javascript, jquery and HTML/CSS
- Bonus track: Graceful degradation versus progressive enhancement

Donweb.com

Senior Front End Developer, GUI designer and PHP developer

July 2010 - May 2014 (3 years 11 months)

Argentina

Senior Front End / LAMP developer at the product strategic development department and GUI designer and client side application layer development (UI/UX).

Main responsibility:
Developer responsible for the GUI design and client side development (UI/UX) of the application EnvialoSimple.com

Currently concentrating on:
- HTML5 / CSS3 / Javascript / Angular front end development
- Releasing new products for the company.
- Reviewing /maintaining current products.
- GUI redesign.

Main activities
• Senior LAMP/WAMP Web Developer (PHP 5 - MySQL 5);
• Customer PHP front/back end applications development
• GUI designer and developer;
• GUI usability consultant;
• XSLT, Javascript, JQuery, , Twitter Bootstrap, Ajax controlled interfaces designer.

ADW Group Italia

Telecommuter - (Web Developer, PHP programmer and Graphic Designer)

December 2003 - March 2011 (7 years 4 months)

Since 2005 Lead developer handling team of 4 developers (1 php developer, 1 senior flash developer, 1 graphic designer, 1 data entry).

Currently concentrating on:

- Corporate web sites development.
- Product catalogues and e-commerce web development.
- GUI redesign.

Main Activities

- Senior LAMP/WAMP Web Developer (PHP 4/5 - MySQL 4/5);
- CMS developer;
- PayPal payment integration;
- SEO (Search Engine Optimization) consultant;
- GUI designer and developer;
- GUI usability consultant;
- Audio production for reach media;
- Javascript, JQuery, Ajax controlled interfaces designer.

Hyperlynx

Graphic Designer

September 2003 - November 2003 (3 months)

GUI graphic design development for LINKSBuilder (client/server java application).

(see: http://dmolin.no-ip.org/en/works-hyperlynx.html)

Design and development of LINKSBuilder by Davide Molin (http://www.linkedin.com/profile?viewProfile=&key=4779052)

IMC Internet Marketing Communication

Web Developer

July 2001 - September 2003 (2 years 3 months)

PHP Web developer, DHTML developer, photo editing and digital media designer.

Education

Universidad Nacional de Rosario

Music · (1992)
