PROFFESSIONAL RESUME

Name: Rubén Muccilli **Role**: Senior Developer

SUMMARY

An enthusiast developer, with more than 15 years of experience in software development. He has worked as Java Developer in a broad range of projects. Wide experience using Open Source frameworks and other areas of the J2EE stack. Strong knowledge of data warehouse designing.

DOMAIN EXPERIENCE

He is fulfilling as main software engineer, keeping close relationship with developers from distributed teams and client representatives.

Currently, he is working in Endava as Senior Developer for an important American strategic consultancy. He is participating in the development and maintenance of their digital bench marking and continuous improvement platform.

He also has experience working on data integration projects for Business Intelligence solutions.

CORE TECHNICAL SKILLS

Programming languages & technologies:	• Languages: Java, Groovy and PL/SQL • Java EE, Spring, Spring Boot, JPA, Hibernate, Spring MVC, Spring Data Rest, Spring Security, Grails. GWT, JSF, • JMS, Active MQ, Apache Kafka, EHCACHE, Docker • Reporting: Jasper Reports. • Web Services: REST • Testing: Jmocki, Mockito, Junit, Jmeter
Databases:	• Relational DBs: PostgreSQL, MySQL, Oracle, Redshift • NoSQL: MongoDB, Redis
Build automation tools:	• Gradle, Maven

Versioning systems:	• GIT, SVN
IDEs:	• IntelliJ, Eclipse
Other Tools:	• ETL Oracle ODI, Kettle, BI Pentaho, Docker
Web servers:	• JBoss, Tomcat, Jetty
Continuous integration:	• Hudson, Jenkins, Bamboo
Defects tracking tools:	• Jira, Bugzilla
Techniques & Methods:	• Software Development Methodologies: Agile (Scrum)

EDUCATION AND TRAINING

Qualifications:	2001 - 2007: University degree in Information Engineering Universidad Tecnológica Nacional | Facultad Regional Rosario)
Languages:	Spanish: Native English: Advanced

RECENT PROJECTS

SENIOR BACKEND DEVELOPER IN A PROJECT INVOLVING DEVELOPMENT (DECEMBER 2019 – PRESENT)

The client is an intellectual property-based strategic consultancy and leading enterprise benchmarking and best practices digital transformation firm to global companies, offering digital transformation.

The project is about developing new functionalities and maintaining their digital platform that includes applications and micro services.

Tasks:

- Participating in all the phases of the product development, starting from analysis and outlining the solution's architecture and finishing with the implementation of the product at the client.
- Participating in estimation process.
- Working with Agile methodology (Scrum)

Technical Skills and Tools: Grails, Vue., Java 8, Spring Boot, Spring MVC, JPA/Hibernate, Gradle, Microservices, REST, JMS/ActiveMQ, Postgres, Redhisft, IntelliJ, GIT, Docker, Amazon ECS.

SENIOR BACKEND DEVELOPER IN A PERFORMANCE PROJECT INVOLVING DEVELOPMENT AND MAINTENANCE (DECEMBER 2018 – NOVEMBER 2019)

The client is a American care transitions company (healthcare industry) with the clinical expertise, technology, post-acute provider network, patient database and post-acute care management experience to optimize clinical and financial outcomes across the care continuum.

The project is about improving the performance of one of its applications (Discharge Application). The objective is to stabilize the application and increase the number of concurrent users.

Tasks:

- Identifying and analyzing the performance problem.
- Designing and implementing a performance solution:
  - Development:
    - Code improvements
    - Fixing hibernate issues (N+1 queries)
    - Caching
    - Implementing batch
    - Implementing async and parallel
  - Unit/integration testing
  - Technical documentation
  - Participating in estimation process
- Working with Agile methodology (Scrum)

Technical Skills and Tools: Java 8, Spring Boot, Spring MVC, JPA/Hibernate, Maven, Microservices, REST, JMS/ActiveMQ, Apache Kafka, Oracle, IntelliJ, GIT, Bamboo. New Relic, Jmeter.

SENIOR DEVELOPER IN A PROJECT INVOLVING DEVELOPMENT (MARCH 2018 - NOVEMBER 2018)

The client was an American multinational mass media conglomerate with interests primarily in film and television.

He participated in building an application to integrate, summarize and report the votes for a show event.

Tasks:

- Participating in all the phases of the product development, starting from analysis and outlining the solution's architecture and finishing with the implementation of the product at the beneficiary.
- Participating in estimation process.
- Working with Agile methodology (Scrum) .

Technical Skills and Tools: Java 8, Spring Boot, Spring Rest, Thymeleaf, JPA, Apache http client, Maven, IntelliJ.

SENIOR DEVELOPER IN A PROJECT INVOLVING DEVELOPMENT AND MAINTENANCE OF THE INTERNATIONAL SITES (JUNE 2014 – FEBRUARY 2018)

The client was an American multinational mass media conglomerate with interests primarily in film and television.

He participated in developing, implementing and maintaining the international sites using a grails platform.

Also he worked on other tasks like improving the platform performance, upgrading to the latest grails version and migrating the servers to AWS.

Tasks:

- Participating in all the phases of the product development, starting from analysis and outlining the solution's architecture and finishing with the implementation of the product at the beneficiary.
- Bug fixing.
- Participating in estimation process.
- Working with Agile methodology.

Technical Skills and Tools: Grails, MongoDB, Apache HTTP client, IntelliJ, GIT, Jenkins

TEAM LEAD & SENIOR DEVELOPMENT IN A PROJECT INVOLVING DEVELOPMENT AND MAINTENANCE OF THE APPUP STORE SITE (JUNE 2011 – JUNE 2012)

The client was an American multinational corporation and technology company which supplies processors for computer system manufacturers.

He participated in developing, implementing and maintaining the site for the application store.

Tasks:

- Participating in all the phases of the product development, starting from analysis and outlining the solution's architecture and finishing with the implementation of the product at the beneficiary.
- Participating in estimation process

Technical Skills and Tools: J2EE App, Spring, Spring MVC, Apache Tiles, Spring DAO, HTML5.

TEAM LEAD & SENIOR DEVELOPMENT IN A PROJECT INVOLVING DEVELOPMENT AND MAINTENANCE OF DATA WAREHOUSE MANAGER (JULY 2008 – MAY 2011)

He participated in building and implementing a data warehouse manager application that manages dimension structures, puts data into fact tables through the form functionality, notifies and controls any data changes, and finally generates the report needed.

Tasks:
- Participating in all the phases of the product development, starting from analysis and outlining the solution's architecture and finishing with the implementation of the product at the beneficiary.
- Participating in estimation process

Technical Skills and Tools: J2EE, GWT, GWT-EXT, Spring, SpringMVC, JSON, Velocity Templating, Hibernate 3, and Quartz.

DEVELOPMENT IN DIFFERENT PROJECTS AT NEORIS SOFTWARE FACTORY (FEBRUARY 2006 – JUNE 2008)

He worked as a java developer in different projects and clients.

Tasks:
- Development of the new requirements
- Fixing bugs

Technical Skills and Tools: J2EE, Spring, Spring MVC, Struts , Maven, Informix.

DEVELOPMENT AT LOS GRANEROS SRL (AUGUST 2004 – JANUARY 2006)

He developed the reporting modules for Dealer Management System Client

Tasks:
- Development of the new requirements

- Fixing bugs

Technical Skills and Tools: MSSQL 2000, PSQL, Crytal Report 8.5 and Clarion.
