Eric Michaelsen

Technical Lead / Application Developer
Argentina

Summary

Application Developer in variety of applications, with expertise in a variety of bussiness, like Accounting, Insurance, Localization and Translation and others.

Always willing to learn new technologies to add to my toolbox to solve existing problems as well as refining and using my soft skills to lead and grow up Teams.

I'm willing to hear opportunities for full remote positions.

Experience

Velocity Partners
5 years 1 month

Full Stack Technical Lead @ Sajan
January 2017 - Present (3 years 11 months)
Argentina

- Working for Sajan as an outsourcing contractor of VP. We developed a SPA Project Management Portal from scratch. Techs involved:
• WebAPI 2 as REST server-side data provider
• Dapper for data access
• Unity for IOC
• GHERKIN for writing and Specflow for running e2e Tests (for API)
• AngularJS implementing ES6 via Babel transpiler
• Gulp for common tasks like building, minifying, transpiling and so on
• Karma and Jasmine for running and writing Unit Tests
• GHERKIN for writing and Protractor and Cucumber for running e2e Tests (for UI)

Besides the technical aspects of the role, I also:
• Improve the current Agile Process
• Keep track of Team's development & detect early slips
• Perform Code Reviews

• Enforce development Best Practices on the Team
• Emphasize teamwork

Full Stack Developer @ Cision
November 2015 - Present (5 years 1 month)

- Working for Cision as an outsourcing contractor of VP. We developed a SPA WebApp to allow users to create and publish Press Releases to multiple consumers.

Techs involved:
• WebAPI 2 as REST server-side data provider
• ORMLite for data access
• StructureMap for IOC
• AngularJS implementing ES6 via Babel transpiler
• Gulp for common tasks like building, minifying, transpiling and so on
• Karma and Jasmine for running and writing Unit Tests

Globant
.NET Tech Lead @ Deloitte
December 2014 - November 2015 (1 year)
Argentina

- Working for Deloitte as an outsourcing contractor of Globant. We developed a SPA WebApp to manage the Tax LoB of the client.

Techs involved:
• WebAPI 2 as REST server-side data provider
• Durandal for UI
• Unity for IoC
• Entity Framework 6 (Code First approach) as ORM
• SQL Server 2012 for Data Storage
• Querying external OData WebServices

Besides the technical aspects of the role, I also:
• Create delivery plans for each Sprints
• Keep track of team's development & detect early slips
• Perform Code Reviews
• Enforce development Best Practices on the Team
• Mentor new DEVs members
• Emphasize teamwork
