Career Goals

- Develop and maintain high quality products
- Work on new technologies and new challenges
- Train myself continuously improving my professional and personal skills
- Work in dynamic teams in a humane and genuine environment

About Me

- I am fascinated by the development of videogames and new technologies.
- I consider myself a lucky person to work on what I am passionate about and who grows with all the teams that I have joined.
  Proactive and self-taught, with good interpersonal relationships and always available to help others.
