- C#
- Cobol
- Python
- Shell Script

METHODOLOGIES

- Scrum
- Testing Agile (Certified)

EDUCATION

F.a.m.a.f, National University of Cordoba
- Computer Analyst

EXPERIENCE

November 2013 - November 2017
• IBM • Cobol Developer
Responsible for developing COBOL programs in UNIX (Solaris) environments for the "Naranja" client. Besides this, we also developed Shell Script language to facilitate the execution of batch programs.

• IBM • QA Analyst
Quality analyst with strong technical orientation, and with a lot of business knowledge. Execution of functional test cases, assembly of Test Plans and strategy in the execution of projects. In addition, I provide training at the business level and at the technical level to the testing team.

November 2017 - October 2020
• Tips • QA Analyst
In charge of executing manual tests for both the WEB and WIN versions of the product. Design of test cases, estimates and use of SCRUM methodology.

• Tips • QA Automation
Creation of Frammework and selection of tools for use in automatic tests in the WEB product. Coding of test cases, in charge of perform "code reviews" and establishing programming standards and guidelines. In addition, I created tools, and provided training on what was done.

October 2020 - Present
• Naranja • RPA Developer
Creation of Frammework and selection of tools for the use of automatic backoffice processes. Establish development guidelines and architecture for its life cycle (deployments, environments, manual and automatic testing).
