OBJECTIVE

Looking for an environment with growth and learning possibilities. I am proactive and self-learner, always trying to get the best of each project done. My desire is to make available my knowledge and experiences to achieve the objective sought by the company or client with whom I relate.

Experience

Full Stack Developer
MITROL S.A. (July 2015 - present)
I'm in charge of developing custom integrations for different clients. This involves building new functionalities for the app such as survey forms, reports, etc.
I'm also in charge of building and improving different features for the core system of the company using different Frontend technologies (Jquery, AngularJs, Angular2/4) and Backend technologies (Java Spring, C#.Net).
As a full stack developer I'm in charge of the analysis, development and testing (unit, integration tests)
Some of the project I work in: CRM, Web Softphone, Task Scheduler, Generic Mail Client, Web Player

Content Editor (June 2014 – August 2014)
CRAVERO S.A. AXION ENERGY ARGENTINA S.A.
I had the task of the content creation based on templates, and content programming. I was in charge of the research and implementation of a software that generate the multimedia content that is shown on screens arranged in the mini markets of the service stations.
Administrative technician (January 2010 – July 2015)
TAEM S.R.L.
Main responsability was to help with administrative tasks of the company. Also interacting with customers.

Education

Information Systems Engineering (2011 - present)
Universidad Tecnológica Nacional - UTN

Mechatronic Technician (2010)
Instituto Industrial Luis A. Huergo
