Skills

Trustworthy and proactive, versatile against how to tackle and resolve each situation for every project in the adequate manner. I like to be involved in all the stages of a project. Always looking forward to sharing, acquiring and gaining knowledge, technical or not. Willing to give all helping the team in order to achieve the goals on time. I have high regards for both career and human growth.

I have been working as a QA since 2012. I want to increase my knowledge with tools and methodologies in the area; and in the long term move towards front end development. I did some NodeJS and React courses. I am also interested in Computer Security, although I have not explored much the field.
Also teamed up with local or foreign teams for different projects, each with its own methodologies and ways of working. Experienced in automation with Java, Javascript, Python y C#.

Experiencia

Valtech Digital / Ssr QA Analyst - Jr Dev

JULIO 2016 - PRESENT

Valtech acquired Graion in July 2016
