I am an enthusiastic and self-motivated web developer. Technology is my passion and I am always up for challenges, developing skills and learning new things everyday. I enjoy doing my best to enhance team working and build up good relationships with my teammates. Also, I like to set myself goals that I will achieve so I can work by my own initiative too.

EXPERIENCE

Globant, Argentina — *Web UI Developer*

September 2016 - PRESENT

I am responsible of delivering high quality front end solutions for responsive multi-language web applications. My everyday tasks includes:

- Estimation, assignment and tracking of the team's tasks
- Bug fixes
- Code reviews
- Selection and implementation of application dependencies.
- Deploying to development, testing and production environments.
- Interviewing and training new team members

Working side by side with backend, Android and iOS development teams, I have to take part on cross-platform technical decisions about performance, user interface and user experience.

Some technologies and languages I have to work with are:

- Javascript ES6 - Babel JSX
- HTML5 - CSS3
- React - Redux
- SASS
- Node.js - NPM
- Webpack
- Own libraries and frameworks
- Social Media Integration
- Git tools
- Atlassian's Codeship, Sourcetree, Trello and Jira
- Agile methodologies

Plastic Omnium, Argentina — *IS&S Trainee*

June 2015 - December 2015

As a trainee in a car parts manufacturer some of my responsibilities were:

- Service desk support using tickets tracking tools
- Installation of computers and licenced software
- Backup and restore control
- Inventory control
- Assist to users
- Providers and warranties management

SKILLS

HTML5
CSS3
Javascript ES6
ReactJS
Redux
SASS
Responsive
Node.js
NPM
Webpack
Git

LANGUAGES

Spanish - Native
English - Advanced

EDUCATION

Universidad del Salvador, Argentina — *Information Systems Engineering*

March 2013 - Present (Finish date: December 2018)

Colegio Parroquial San Marcelo, Argentina — *High School*

2012

PROJECTS

Buenos Aires 2018 Youth Olympic Games — *Web Application*

www.buenosaires2018.com - UI Engineer

While working at Globant, I had the chance to work in the front end development of the digital platform side by side with backend, iOS and Android development. Using React, Redux and Sass were my main tasks followed by taking decisions on user experience, performance and data architecture.

TNT Sports LA — *Streaming Web Application*

www.tntsportsla.com - Web UI Developer

Web development using React, Redux and Sass. Working with television and streaming providers was a challenge. My final task was to train a junior developer to use the frameworks and continue with the project.

Messi.com — *Web Application*

www.messi.com - Web UI Developer

Views and UI components development and styling using React, Redux and Sass. The platform uses live gamification technologies with Messi matches.
