EXPERIENCE

IGT Argentina — May 2018 — Present

Logistics Analyst

KPI's management for continuous process improvement process in logistics area. Create and maintain dashboards using SAP BI toolkit for follow up meetings. Create and analyze different reports for the area related to productivity and control management to be presented directly to the regional director. Monthly inventory control and analysis for report generation as well as initiating price/safety stock readjustments in SAP.

AVIATSA – APS Group — January 2012 — December 2016

Logistics and Material Planning Lead

Lead a team of 4 geographically dispersed co-workers. Organizing and delegating the workload as well as provide guidance in developing and evaluating plans and procedures that affected the flow of consumables, parts, critical-components and dangerous goods. In my first quarter, I initiated the development of a process framework to improve the efficiency of company logistics after performing a deep analysis of current logistics practices to determine areas of possible improvement. Control and follow up of AMOs budget. Analyze cost estimation including different variables for annual and bi annual forecasts. Analyze production capacity and material consumption to optimize the supply chain and reduce the raw material.

AVIATSA – APS Group — January 2013 — December 2016

QA/QC Engineer

Collaborated on a team of 3 to prepare, document, and execute inspections to determine compliance with RAC-145 aeronautical regulation and law. My responsibilities included reviewing and approving quality requirements for supplier purchase orders. Proposing, documenting, and audit QA/QC practices, program quality, and metrics reporting system.
