Professional Summary

Born in June 27th, 1995, Alan Fraga has been interested about the computer's inner workings ever since an early age.

This passion started when he got his first computer. From that moment his passion for programming and Game Dev hasn't stopped. Starting from modifying Video Game scripts (such as Starcraft and Doom), to altering the source code of various Games (like Quake and Half-Life

Today Alan is renewing his love for programming thanks to the Academic Programming Technician career that the Universidad Tecnológica Nacional offers, and is in search of new oportunities that can help him to deepen his knowledge.
