Objectives

I wish to keep growing on a professional and personal aspect, learning different **technologies** that provide a good solution for different kind of problems and working with different professionals across the globe.

My main interests are focused on web systems design and development: modeling a solution based on the MVC pattern, knowledge of web services, browser performance, cross-browser solutions, use of different frameworks, object oriented solutions looking for flexibility and maintainability.

I am working as part of a team and we are following the Facebook tech stack: React.js, redux, react router, bootstrap and react bootstrap, restful api, nodejs, webpack, less, and many others.

Spoken languages

- **English** Advanced, spoken and written.
- **German** Intermediate, spoken and written.

Academic

- Systems Engineering. Status: **incomplete**

Some projects in Github

- ChartyJS: open source charting library, built entirely over d3, using d3.chart as framework. The solution is based on a “composite” design pattern. The project, with the corresponding design details and documentation, can be found on Github https://github.com/chartyjs/charty . (Project is currently outdated and no longer maintained)
- Development of a specific metrics visualization : “polymetric view”, implementation using d3. The project can be found on Github https://github.com/marciocaraballo/polymetric-view

Trainings / Courses

- Globant HTML5 Bootcamp (November 2012 – 5 weeks)
- Final Bootcamp application combining Backbone, Foursquare API + Google Maps API
- Front End Magento training (1 month)

Experience

Split Software - UI Engineer / UI manager January 2016 - Today

- Product development.

Globant - Web UI Developer January 2015 - December 2015

- For Nero: mobile **Music Player**, aiming at components reusability, flexibility and mobile performance. Facebook stack: reactjs, omniscient, immutable, immstruct, restful api, nodejs, expressjs, Grunt, git.
- For Turner - CNN : redesign and implementation of different internal CNN applications.

Summa Solutions - Front End Developer May 2014 – January 2015

- For Cencosud : **Jumbo a Casa**, redesign of the homepage of an e-commerce platform, HTML, CSS, javascript. Custom ecommerce platform. Responsive design targeting mobile, desktop and tablet.
- For Unicomer: **Tropigas,** a non-transactional Magento implementation. Catalog platform built for specific tablets / all-in-one computers.

Globant - Web UI developer December 2012 – May 2014

- For PWC : **TurboTax on Site**, javascript, Java, XML development.
- For EMC : **IM Services**, web site migration to a CMS platform (Fatwire).
- For Deloitte : **MAR Central Phase 2,** in charge of charts development, javascript, CSS and HTML in a .NET MVC multiple page application.
- For Fbiz : **Qualicorp,** Sass, CSS, HTML, javascript, .NET MVC.

Other facts

- 2004 : Took part in a cultural exchange with Germany. Duration: 4 months.
- 2009: Paper publication at EST corresponding to 40 Jaiio, Córdoba city, about information recommendation on social networks, based on network topology. Publication can be found on http://www.40jaiio.org.ar/sites/default/files/T2011/EST/TrabCatedra/998.pdf .
