## EDUCATION

**Universidad Nacional del Centro de la Provincia de Buenos Aires** Start in 2008

*Bachelor of System Engineering*

## WORK EXPERIENCE

**Split** Tandil, Buenos Aires, Argentina

*UI Engineer* Mar 2016 - Present

- Part of the web team developing the front-end of the product using React.js and Redux, Express on the Node.js layer;
- Extremely agile development practices where the context doesn't have everything defined and you need to make decisions to complete the feature, and iterate over time.

**Globant** Tandil, Buenos Aires, Argentina

*UI Engineer* May 2015 - Mar 2016

- Worked with client side tools for CNN's content management system and other internal tools;
- React.js coaching to grow the company expertise;

*UI Engineer* Dec 2012 - Dec 2014

- Web developer working for Deloitte development team. I was part of 2 big projects with 20-40 people involved;

**Summa** Tandil, Buenos Aires, Argentina

*UI Engineer* Dec 2012 - Dec 2014

- Part of a team behind a very important supermarket chain's web app;

## MAJOR PROJECTS

**Split Web App** 2014 - 2016

*Web application*

- It's currently on production being used by 30+ clients.
- Leadership on the design and development of the building system using Webpack.
- Used React, Redux and React Router for the client side foundations.
- Integrated a grammar using Antlr to parse and build an ast to be easy to handle for the UI.
- Worked on a extra layer with Node.js to handle logins and extra validations.

**Nero Back it Up (Nero)** 2015

*Development service for a new product where users should be able to interact with his media files in a more engaged way*

- Used an isomorphic React.js implementation.

### JumboACasa (Cencosud) 2015

*Redesign of a preexisting web app*

- Main design was focus on a responsive design to be able to work in every mobile device.
- Refactor of legacy code to be updated with more updated javascripts libraries to improve code maintainability.

### PreHire (Deloitte) 2014 - 2015

*Web app to hire people in a more agile way.*

- Working as UI developer using Knockout.js and Durandal.
- Helped in the development of a inner framework to improve team's development and maintenance code.
- Leadership on the designs and configurations for the Unit Test for the whole project (15 - 20 UI Developers).

### MarCentral (Deloitte) 2013

*This project was an existing Sharepoint 2010 tool developed by a Third Party for Deloitte. Its main purpose is to facilitate M&A engagements for the clients of the consulting practice. As part of its roadmap, a redesign overhaul was requested*

- Worked as UI developer.
- The goal of the architecture was not to replace the current technology, but to build a side-by-side optimization that improves the UX capabilities while still maintaining the flexibility and familiarity of SharePoint for future upgrades.

### Exceptional (Deloitte) 2013

*Application for analysis and comparison of data between different companies*

- My tasks in the project were based on the development of the UI using the latest technologies and applying responsive design.
- Backbone.js, JQuery, Handlebars, Bootstrap.

### TurboTax (PWC) 2013

*Team Member to Globant's Contractor PWC*

- Working as UI developer on the website http://turbotax.intuit.com, developing different screens and applications logic.
