FRONTEND/FULLSTACK DEVELOPER

EXPERIENCE

(2020– January 2021)

SENIOR FRONTEND DEVELOPER

OLAPIC

Creating a Javascript Widget to render in any website that displays UGC (User Generated Content).
The Widget development not only involves the Widget's code but also all its ecosystem: versioning management, creation of widget types, deploying and serving assets, translation API, sandbox environment.

► Javascript/CSS/HTML5
► Svelte 3 / NodeJS
► Web APIs
► AWS DynamoDB / MySQL

(July 2016 – 2020)

APPLICATION SUPPORT FRONTEND DEV.

OLAPIC

► Part of the team in charge of taking care of issues that appeared in the platform. Our team managed to gather a holistic view of the whole platform and its parts.
► Develop solutions for internal customers. Worked in internal tools or small solutions aiming to benefit others in the company. Combining Scrum with Kanban to adapt to the Support/Product focus.
► Involved in Product development. Focus on the Frontend Side. Our team took the challenge of developing features that were later released to the customers.
► Collaborate with other development teams. We were able to help other product teams when releasing features.
► In constant communication with teams from other locations.
Being part of the App Support team required to establish communications with people from our other offices (NYC, London) in order to communicate with 1st Line Support, Account Managers, Product Managers, etc...

(September 2015 – July 2016)

WEB UI DEV.

GLOBANT

Disney Parks And Resorts Digital:
► Started with a kind of "back-up team". We were performing mostly support activities and developing some internal tools.
► Worked with Agile methodology.

(September 2014 – September 2015)

FULLSTACK DEVELOPER.

EXET

► Worked on different products: eCommerce/Catalog page, Government applications.
► Small company, so we had to perform development from designing DB and queries, to creating a user interface.

OTHERS

- Agile methodologies: SCRUM/KANBAN
- Atlassian JIRA/Confluence
- Notion/Trello
- Figma
- Github
- Jenkins
- Docker / Kubernetes
- AWS / Akamai
