Pursuing University Degree in Information Technology

UTN - Facultad Regional La Plata 2004-2007
Incomplete studies in Information Technology Engineering

EPET 14 1998-2003
Electronics Technician

WORK EXPERIENCE

Patagonian Tech Jul'19-Currently
Title : Developer

Main developer in a core customer Application, working mainly with React Native. Adding features and bugfixing the application, using tools such as Formik, Native Base, Context, etc.

Inenco Jul'17-Jun'19
Title : Senior Developer

As the lead developer in the project, my tasks include not only address the most complex development bullets, but also train the Jr. Developers and clarify the stories with the customer. The project is an inherited development, received after a the customer ended relationships with the previous development team. The main targets of the project are addressing HR & payroll duties for Provincial Government.

Accenture 2014-2016
Title : Software Engineering Analyst

I was hired on the Mauritius branch of Accenture as a second line support agent. The project was a huge development for a Dutch Oil storage company, which had many terminals located throughout the globe. As the sole native Spanish speaker in office, I was in charge of relationships with the terminals from Mexico, Venezuela, Spain, and other Spanish speakers in other locations. My main tasks included fixing stock and invoicing inconsistencies, testing and articulating with the development team when recurrent issues where found.

Accenture 2012-2014
Title : Senior Developer

After the project where we worked for in Argentina was moved to the Indian branch of Accenture, I was transfered to an inner project. This development in SSRS and SSIS was used by the Finance department of Accenture, for auditing Tax revenue information.
