Franco Rabaglia

Full Stack Engineer en SparkDigital

Extracto

Kind of a nerd, homebrewer, skater, music lover, and traveler born in Argentina.

Day by day i work on development, leading technology teams , taking architecture/infrastructure decisions on different kind of digital platforms like, web apps, native apps, backend services, vr/ar stuff, digital advertising and social media integrations.

Please, live and enjoy! # And let the others live peacefully.

Experiencia

SparkDigital

Full Stack Engineer

enero de 2020 - Present (6 meses)

Working as Fullstack Engineer developing solutions for a complex microservice enviroment. Stack: Node.js + React + MySQL + AWS.

Genosha

Cloud Engineer

agosto de 2019 - enero de 2020 (6 meses)

AWS Infrastructure for different clients. Serverless and autoscaling is the key, automation the rule.

Some metrics and constraints i've resolved:

- Over 300k active users.
- Over 50k pageviews per hour.
- High availability.
- Network Security implementations.
- E2E SSL encryption.
- Continuous Integration.

Working with AWS + Mongo Atlas + Buddy CI and some other tools. Design, estimation and automation are always part of the process.

REALLY™
Architect and Full Stack Developer
enero de 2019 - agosto de 2019 (8 meses)
Argentina

Designed and developed the client Architecture for the Beta of Really PWA Client, on a complete Javascript ecosystem. React, Redux, Node, Firebase RTDB and ElasticSearch are the main technologies, running on Google Engine .

Genosha
Full Stack Engineer & Tech Lead
enero de 2016 - enero de 2019 (3 años 1 mes)
Paraná, Entre Ríos

At GENOSHA we work in small teams, less than 10 humans commonly. Designers, creatives, producers, copywriters and there are other not tech roles on the teams... I really appreciate working with designers

My role at the company is a merge between being defining and mutating our tech stack, be responsible of the team to find ways and time to read or educate, estimating features and taking care about quality. At some projects, i may take one role between lead, backend dev, architect or infra. We work with different stacks and technology talents.

BeerTaps
Co-founder
junio de 2016 - enero de 2018 (1 año 8 meses)
