• I estimate efforts to create automation framework and tests, and communicates progress clearly to management, as appropriate.
• I participate in day-to-day QA activities.
• I provide input on testing methods, processes, tools and systems.

Experiencia

ROFEX - Bolsa de Comercio
Software Quality Assurance
octubre de 2017 - Present (3 años 1 mes)

Works with project teams to ensure overall software quality is monitored and maintained and/or validates system QA standards necessary to execute test plans and procedures for acceptance testing of new or modified applications/ systems. Has some interaction with business area execs, vendors and operations execs in determining whether systems and system components, including hardware, networks, system software, tools, and applications are appropriate and/or ready for implementation. Fosters stable support framework for development teams and business units in the area of quality control and the development of new or revised applications. May provide guidance in the creation of standard test environments, tests plans, and test scripts. Analyzes, designs, documents new or modified QA procedures and standards and assists in the development and implementation of QA metrics for assessing the quality of delivered applications and information systems. Provide resolution to an assortment of problems complex in scope, related to Quality Assurance projects. Individual contributor role.

Online Banking Web Applications – (Freelance Project)
QA Analyst engineer
junio de 2015 - Present (5 años 5 meses)
Remote

Responsible for working in partnership with other automation engineers to build an Selenium Automation framework to house Smoke and comprehensive Regression test cases on Online Banking web applications, with Mobile tests. With the framework developed, I worked developing and executing comprehensive suites of automated test plans and test cases, maintaining and adding to the framework, and continued evaluation of test cases being created per User Stories, in an Agile/SCRUM environment.

Accenture
6 años 9 meses
