Angel Lubenov

Technical Lead, Software Designer at Globant
Greater Rosario

Summary

Highly skilled software professional with more than 16 years in software design, development and integration, with advanced knowledge in algorithms and data structure which allows bringing abstract and suitable solutions to any problem regardless of the programming language.

Always looking for challenges and ways to improve thinking skills in order to maximize productivity by bringing simple and effective solutions to complex problems.

Passionate about switching to the real world by interacting with clients and listening to their feedback to give a quick respond to the changing needs of business.

Less important: Advanced knowledge of Javascript, C#/C/C++, asynchronous scenarios (promises, threads, critical sections) and functional paradigm languages (Erlang, Haskell, ML, scheme).

Experience

Globant
Senior Technical Lead
October 2019 - Present (1 year 4 months)
Rosario, Santa Fe, Argentina

NEMO GROUP
SME Software Architect / Product Owner
April 2018 - October 2019 (1 year 7 months)
Rosario Department, Santa Fe Province, Argentina

I'm the Gringotts' dragon of my product backlog, there is no stakeholder brave enough to attempt changing it unless they come with the magic will of sharing the product vision. Gringotts' goblins love me because I have no problem changing my PO hat to the Architect one, roll up my developer sleeves and help them to meet the sprint goal.

Also, I am the creator of Origami, an innovative system for creating tourism dedicated landing pages with the only objective of converting visitors into happy clients.

With Origami I empowered tourism operators, I allowed them to increase OTAs booking by bringing cutting edge web+mobile technology to its business.

Tableau Software

Senior Software Architect / Security Champion

September 2015 - April 2018 (2 years 8 months)

Rosario, Santa Fe, Argentina

I am a proud member of the Web Data Connector (WDC) team.

Tableau desktop is a BI software designed to support how people think, leveraging our natural ability to spot visual patterns quickly.

In a fully connected world, people need to be able to gather information from as many data sources as possible, our main task in WDC team is to make that possible.

Tenaris (By Globant)

1 year 11 months

Front End Leader

April 2015 - September 2015 (6 months)

Rosario, Santa Fe, Argentina

As Front End Leader in "Tenaris Licensees Network" project my work consist in coaching my coworkers for keeping the UI part of the system updated and optimized with the latest technology and ensuring the best user experience to the client.

Currently using the following technologies:

- Angular
- Promises and Deferreds
- CoffeeScript (legacy part of the system)

Senior Front End

November 2013 - April 2015 (1 year 6 months)

Rosario, Santa Fe, Argentina

I am currently working on the "Tenaris Dispatch Planing" project using the following technologies:
- Angular
- Q (Promises and Deferreds)
- Knockout JS (legacy part of the system),
- underscore.js (functional paradigm)

Dattatec.com
3 years 9 months

Technical Coach & Recruiter
September 2012 - November 2013 (1 year 3 months)
Rosario, Santa Fe, Argentina
