Rodrigo Perez Varas

Software Producer

Argentina

Summary

Skilled programmer with 10+ years of experience, during which I had the opportunity to work with many different technologies and software production processes. I possess a deep knowledge of several programming language such as C++, C#, Javascript. And a profound understanding of software architecture and design patterns. I'm a fast learner, very committed with quality and customer satisfaction. I'm also very easy to work with.

Experience

Gilbarco Veeder Root

Full Stack Dev / Tech Lead / SME

November 2009 - Present (11 years 3 months)

FULL STACK DEV / TECH LEAD / SME (Jul 2016 – Present)

•• Oversaw software development for two scrum teams.

•• Designed the architecture of a tablet based, HTML5 PointOfSale solution, and the .NET backend.

•• Participated actively on several innovation events to define new products and improve processes.

•• Performed problem resolution activities and root cause analyses on software production process.

•• Integrated GIT code repository to Argentinian teams daily work. In addition, I involved in repositories management tasks.

•• Defined a strategy for unit testing old VC6 code.

•• Wrote software in C++, C#, JavaScript and probably others

SENIOR C++ DEV / SME (Mar 2014 – Jul 2016)

•• Designed and implemented new EMV (chip cards) payment interface for different of our retail solutions.

•• Assisted on PA-DSS certification for several of our solutions.

•• Assisted multiple teams, in Argentina, USA and India, with requirements definitions, solution planning and implementations.

SENIOR C++ DEVELOPER (Nov 2009 – Mar 2014)

•• Implemented different requirements on the company owned electronic payment interface, for the company POS solution.

•• Implemented different electronic authorization protocols over TCP and UDP.

•• Certified Scrum agile methodology.

Globant

C++ Senior Software Developer

May 2009 - October 2009 (6 months)

C++ Senior Consultant

Nektra

C++ Ninja Software Developer

December 2006 - April 2009 (2 years 5 months)

Buzzwords: C++, Win32 Internals, IDA Pro, COM+, Reverse Engineering

During my time I Nektra I worked mostly reverse-engeniering applications and developing programming interfaces so our customers could integrate their solutions to these applications.

As part of my work in this company I also participated in developing tools to make it easier to analyze closed-source applications. These tools, in time, were also used for malware analysis and environment virtualization.

I believe Nektra provides very complex products and services, and they do it excellently. I enjoyed very much participating in it.

Gobierno de la Ciudad de Buenos Aires

Senior Developer

October 2002 - November 2006 (4 years 2 months)

C#, Smalltalk, MSSQL, MySQL, PHP, Administrative Software

Education

University of Buenos Aires

Mathematics · (2003 - 2006)
